

PRESS RELEASE:

## Milab presents the DC-96C condenser microphone

Helsingborg, Sweden – 2010-03-11

The latest addition to the Milab product family is the **DC-96C**, a side-addressed large membrane microphone designed mainly for studio work, but also for many live applications. The DC-96C is the latest version of the classic DC-96 series - originally released in 1967 - and has been updated with the latest technology. It shares most of its components, including the capsule, with the DC-196, but like previous DC-96 versions, it is cardioid only and has a single layer mesh grid.

The DC-96C is suitable for a wide range of applications, including studio vocals, acoustic guitar and piano, hi-hats and overheads, guitar amps and more.

Features:

- \* Hand built in Sweden
- \* Cardioid
- \* Large rectangular condenser capsule
- \* 12 dB(A) self noise
- \* Transformerless
- \* 12 dB attenuation pad
- \* 144 dB max. SPL
- \* Gold plated XLR-connector

Shipped with:

- \* Individual frequency chart
- \* Windscreen
- \* Stand adaptor

The DC-96C will be presented at Prolight + Sound in Frankfurt, March 24-27. **Visit Milab in Hall 8.0, booth A47.**

Like all Milab models, the DC-96C comes with a lifetime warranty.

About Milab:

The history of Milab Microphones goes all the way back to 1939 when founder Rune Rosander started building microphones. More than 70 years later, all Milab microphones are still built entirely by hand in Sweden. Every microphone is measured independently and shipped with an individual frequency chart. All new Milab microphones come with a lifetime warranty.
