

## PML Clarity Small Membrane Condenser Microphone

Clarity is well adapted to every kind of application, recording in the studio or live. This microphone offers two different capsule heads, cardioid and omni. Clarity can be purchased with either capsule head or both. It has a low noise transformer-less preamp. PML Clarity will perform well in capturing orchestras, choirs, all kinds of instruments and as overhead mics for drums. Alternatively, PML Clarity will perform well on a lectern or in a Radio/TV studio, where its small size and discreet appearance is an advantage.

PML Clarity has a durable black Chrome surface finish. It is delivered in a shock-proof carton tube. The tube has room for both capsule heads. The clip 1820-T is included.
